The people in the neighborhood, who are the ones to profit by this opening of the park in the cool evening hours, were loud and carnest in their delight at the ready esponsal of their needs and right by THE EVENING WORLD.

WOMEN OFFICIALS.

The high respect due to the gentler sex med to have been beautifully illustrated out in Edgerton, Kan., when a numer of women were elected to municipa ositions. To use an old paradox, the town is manned by women.

That is, it seemed to be. But now the

men, hateful, horrid things, have come forward and said they ran the women folk in just for fun, and they have kicked violently against the large and womanly ne of town keeping which the fair ficials had inaugurated. They had planned to lay pavements.

lean the streets, sat on the cider joints, and furbish up the civic belongings in a thorough business-like way. But when they saw themselves antagonized by their false-hearted patrons the wrath of the women rose and they resigned.

This is very sad. When woman is disposed to be helpful and economical why should is arouse such opposition in the manly spirit? Can this be jealousy?

Mrs. Robert Goelet is not yet thirty years of age. She has a cottage in Newport worth \$250,000 and an income of \$182,500 a year, or \$500 a day. Her father is George Henry Warren, the wealthy financier, from whom she learned how to keep her account book balanced. Mrs. Goelet is exceedingly pretty. She has bright yellow hair, a fai complexion, violet eyes, and her manners are those of a patrician lady. Yes, it's a common occurrence," said the physician. "She carries her morphine and hypodermic syringe. Her body is probably covered with the scars left by the needle. She can inject mor-phine into herself with a dexterity and finish that cannot be equalled even by a physician. You see these cases every

woman who had acquired the fatal habit, and from her learned to use the drug.

On her return to school she frequently requested permission to study some particularly difficult problem in an unused class-room, where the Sisters, passing out and in, frequently found her bent over her studies, her hands shading her face, and apparently absorbed in her task.

A handsome stylographic pen was her constant companion, although she was never seen to use if.

One day one of the Sisters found her studying as usual, and spoke to her, but received no reply. Supposing the girl to have failen asleep and not wishing to disturb her, the Sister picked up the pen to leave a short note for her when she should awake, but was unable to make any mark with it. Closer inspection showed that the stylographic pen was a blind to conceal a tiny hypodermic syringe, and the bottle beside it, supposed to contain ink, in reality contained the solution.

She was sent home, and under the care morphine friend! What a terrible train of thought the mention of these three words send rushing to the brain.

two Roosevelt Street Ferry tickets.

The girl was of a buoyant, hopeful nature, and the trouble she is said to have had with her brother on the week previous to her disappearanes did not seem to weigh heavily upon her, although it may have led her to form strapge acquaintances and seek diversion away from her home.

Lizzie was employed at the job printing house of Robinson & Co. 288 Washington street, and was the only girl in the establishment. The foreman said this morning "Lizzie was a quiet, industrious girl, and as far as I know had no lovers. She came to work in the morning at 8 o'clock and remained until 6.

"The week previous to her disappearance she came to me and said that her brother-in-law had reproved her for beins out on the atreet until 2, 30 with a girl friend. I told her that her brother-in-law was right in the matter and for her to stay at home in the evening.

Easy reckoning thus shows that every drop contains one-thirtieth of a grain of

By easy stages the dose is increased. The appointe becomes more and more imporative in its demands, and the poor victim has to keep on increasing the dose in order to get the full effect of the drug. It no longer is a pleasure to take it. It is a duty. The method of taking it is by injecting it under the skin.

The most common there for doing this is on the lower limbs, though many prefer the arm just above the elbow.

The skin is carefully pinched up from the flesh and then the needle by a quick thrust is driven under it. The syringe generally contains more than the dose actually needed. This is done in order to prevent any air from being injected under the skin. matter and for her to stay at home in the evening.

"On Thursday, April 17, she was paid her week's wages, and left her work, as usual, in the evening. The next day her brother-in-law, Max Castiora, called on me and said that the girl had not returned home the night previous, and that her folks were worried about her. That was the last I heard of the matter until the inding of Lizzie's body on Saiurday. I am sure Lizzie had money with her when she left her work."

The dead girl's sister at 91 Ellery street, said to the reporter?

"I do not understand how Lizzie came to her death. She used to walk around the street in the evening with her girl acquaintances, but I did not approve of it, and the week before she disappeared we had words on the subject. Her eldeat sister always remained at home in the evening, and I thought that she should do likewise. I do not think she had a lover, and I am sure no quarrel could have driven her to suicide."

Morphine is cheap. It is only a cent a grain, and it can be procured by almost any one in any drug store. The pharmacists make a show of denying morphine to any but those who have prescriptions, but they find it hard to give up one of the most profitable branches of their business. Still there are many reputable men who positively refuse it without a prescription. The frauds are wary, however, and can write their own prescriptions, signing the name of some fictitious doctor. If by any chance they are deprived of their "dope" their condition becomes pitiable. The poor beings suffer the tortures of the damned. It is food and drink and life to them, and when they cannot get it their features become distorted, their cychalls sink deep into their heads, and pains rack the body from the top of the head to the sole of the foot. They frequently go crazy from the want of it, and not infrequently does one hear of a victim's death from an overdose. These morphine "fiends" only use the

The drunken orgins of mother and son had so annoyed the neighbors that the land-lord gave them notice on Saturday to quit. To-day they were to go out.

Mrs. Richards vowed to get square with the landlord and to make things hot in the house before she left it, and she kept her promise.

Saturday night she and her son Daniel started out on a debauch, which they kept up through the night. The growler went up and down those stairs until daybreak, and by that time mother and son were fighting

As morphine taking may be considered a species of insanity, it is not strange, therefore, that the victims resort to cunning devices to procure the drug or to conceal their fatal weakness.

A case of this kind was recently brought to light in a Massachusetts convent, where, among the pupils was one of Boston's fairest daughters, of wealthy and aristocratic parents.

During one of the Summer vacations she was the guest of a young married woman who had acquired the fatal habit, and from her learned to use the drug.

Started out on a debauch, which they kept up through the night. The growlest wentup and by that time mother and son were fighting drunk.

growls of coming trouble made themselves heard again.

Then the war broke out afresh, and tables, chairs and crockery flew around and were smashed in a seneral wreck. Old man likehards took refuge with the neighbors, together with his two children.

At 11 o'clock at night came the final and decisive set-to, in which mother and brother made common cause against Mary Ward, who still tried to reason with them.

They knocked her down, trampled on her, dragged her around the room by the hair, and the male brute kicked her prostrate form until the senses left her.

In that condition Policemen Smith, Barry and Hildebrandt found her with the drunken brother standing over her, fairly exhausted by his own violence.

Mary bled from many cuts and bruises. Her mother and brother were a horrible sight with their bloated faces and blood-shot eyes.

They were so drunk that they fairly had to be dragged to the police station in Eighty-eighth street and could not talk coherently nor stand steady on their feet. They were locked up to be arranged in the Harlem Court to-day.

Mrs. Ward was packed off in an ambulance to the Presbyterian Hospital. She is seriously injured to all appearances besides having her body covered with sore bruises.
